

Important Information Regarding Cosatto Umbrella Buggies

There has been some publicity recently regarding the safety of some umbrella fold buggies.

Product safety is our highest priority at Cosatto, and all our buggies conform to British or European safety standards. All our buggies are also tested regularly and found to be fully compliant and safe when used in line with the instructions.

The main instructions are to:-

- Keep all children clear of the buggy during opening and folding.
- Always use a safety harness.
- Always apply the brakes when stationary.
- Never leave your child unattended – even with the harness fastened.

We wish to reassure all our customers that Cosatto buggies are safe when opened and closed correctly and when care is taken to ensure that all children are kept away when the buggy is being folded or unfolded. Our advice is that consumers should take the same level of caution and care as when opening or closing a door, drawer or any other moving part that can be found in many other baby products.

If anyone has any concerns, please contact the Cosatto Customer Service helpline on 0870 050 5900, or email us on enquiry@cosatto.com.
